

Laser Scanning Presentation to Stroud Building Design Association

15/5/2012

0 Comments

Last Wednesday evening we presented to Stroud Building Design Association, the purpose being to inform the group of the benefits of laser scanning. Stroud BDA is an informal group of design professionals working in the construction industry. The Association was formed in 1995 to provide a forum for those members of the pre-construction team who work either as sole practitioners or in practices of less than five people, predominantly within the Gloucestershire area. Hopefully we have furthered the cause of laser scanning!

Barn Laser Scan Video

8/5/2012

0 Comments

Last week we completed a laser scan of a barn for conversion to dwelling. The brick skin will be retained and an oak timber frame dropped inside. Our survey was to provide accurate internal dimensions to enable the frame design to be finalised.
