Staff training continues through November and December

At Grantham Coates Surveys we recognise the importance of well trained staff and as such have a rolling program of training across all areas to keep our staff up to date with both technical survey issues as well as health and safety.

This month see some of our newer members of the team commence [Blueprint Water Safety's](#) "Module 2 Water Awareness and First Responders" course. This is a great course based on the recommendations from the Department for Environmental, Food and Rural Affairs (DEFRA).

As well as the water course, our newer team members will be doing their Asbestos Awareness training in early December. This is vital for any surveyor expected to work in the measured building survey field.

Due to demand for work at National Grid sites, we are putting together a team specifically to survey Electrical Sub Stations and as such they are doing their Persons and BESC certificates to enable them to work safely in and around electrical installations.

As well as the above courses our whole team is part way through a three day First Aid course courtesy of Nick at [Wideawake Training](#). Again highly recommended.

We are also all booked on a Confined Spaces course this Friday.

Marcin, our trainee surveyor is currently on a two day [LSS](#) training course and will be putting this to good use later this week. We have also offered Marcin the chance to complete [The Survey Associations](#) Surveying Course at Worcester to start early next year.

As well as the above all staff are PTS trained for Network Rail projects and carry CSCS cards.

As you can see its going to be a busy month for training, still time for work though, so if you need well trained surveyors feel free to give us a call.

Training is important to us at Grantham Coates Surveys Ltd.

We welcome Sam to our expanding team

This month sees us welcome Sam, a recent Geography graduate from Aberystwyth university. We look forward to working with Sam at the beginning of a hopefully long and fruitful career in Land Survey.
