Hello to Scott Craddock

February started with welcoming a new member to the Grantham Coates Surveys team. Scott Craddock, formerly of Total Surveys and latterly of Bury Associates has joined us. He brings with him over 7 years of experience of land and measured building surveying.

"I have been working as a Land surveyor for more than 7 years now, on a large and varied range of sites throughout the UK. I have also run projects abroad in the UAE, Oman, Germany and Africa. Over the last four years I have specialised more in laser scanning surveys.

I am fully able to conduct Topographic surveys, GPS surveys, Measured Building surveys and River surveys.

I have many years of experience using Trimble and Leica total stations and Leica GPS. I also have more than 3 years experience using the Leica Scanstation 2, cyclone and cloudworx.

More recently I have been using the Faro Focus 3D, Scene and Pointools for the collection and processing of laser scanning data."

We welcome Scott to our team and look forward to a long a rewarding time together. Please see Scott's [linked-in](#) page for more details.

Goodbye to Enzo Annese

Enzo has been sub contracting to us for the last seven months, primarily helping with our long run of railway bridge scour protection surveys. This month sees him moving on to a permanent position with a firm local to his neck of the woods; no more late night trips down the M6 for early next day starts from Worcestershire!

Enzo has been a valued member of the team throughout this time and we will all be sad to see him move on.

Thanks for your help and best of luck for the future.
CC JMG
