

Flood risk mapping exercise

18/8/2011

0 Comments

This week see us complete a topographic and basic level survey for flood risk assessment. The proposed dwelling will sit right along side a small watercourse. We utilised Leica Smart Rover GPS equipment to establish Ordnance Survey Grid and Datum on site. With levels being recorded across an area of farmland, river banks and adjacent roads we keep our fingers crossed that the Environment Agency approve our clients plans!

Spot level survey required across farmland, river banks and adjacent roads
