

Trainee Land Surveyor and New Laser Scanner

26/9/2014

0 Comments

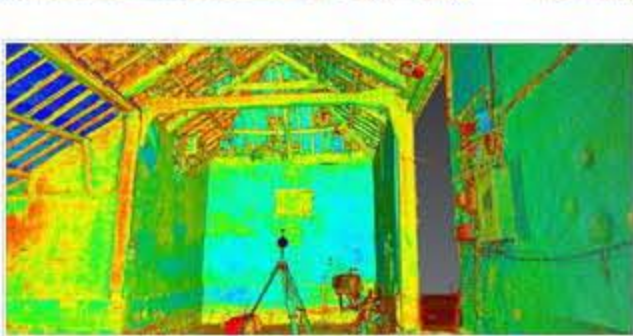

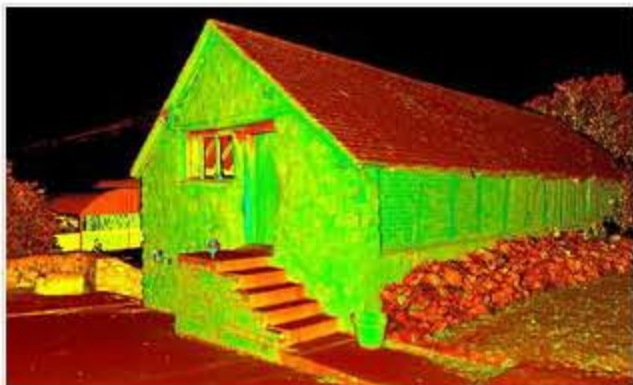

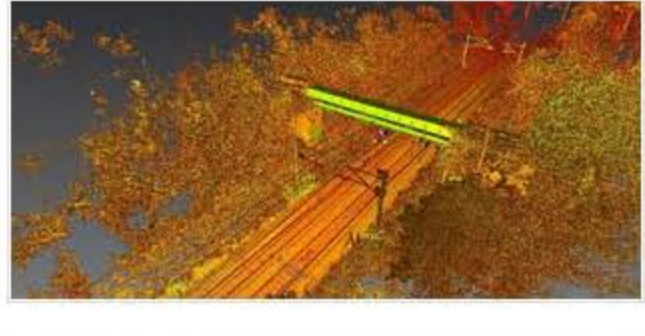

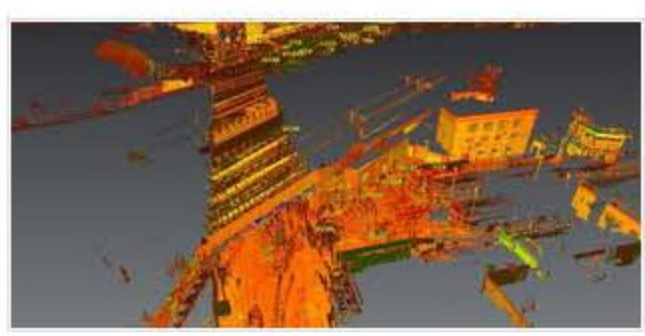

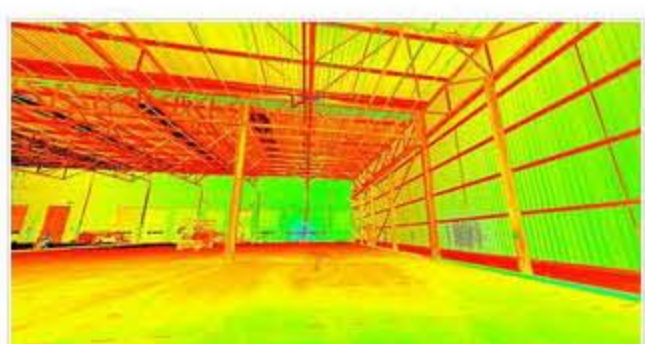

Trainee Land Surveyor

Following a successful recruitment campaign, where we had around 50 applicants, we have filled our trainee land surveyor position. He is due to start at 1st October, we will introduce our latest member of the team in due course.

Laser Scanner

After several years of hiring laser scanners Grantham Coates Surveys invests this month in a Leica C10 Laser Scanner. Founders of the company, John Grantham and Chris Coates have been using laser scanners for over eight years, starting off their scanning career using a Leica Scan Station 2 as well as 6200, 7000, C10 and P20 instruments. In addition to this experience, Scott Craddock has several years experience using Faro laser scanners. We see the addition of the C10, to our range of up to date survey instruments, as an important step, allowing us to become more competitive, flexible and responsive to our customers needs. In this blog posting we pull together a series of images from previous projects.

Trainee Land Surveyor interviews

1/9/2014

0 Comments

This week we will be interviewing 8 candidates for our Trainee Land Surveyor position. We had a great response to our local newspaper recruitment drive with around 50 applicants coming forward over a two week period. We are very much looking forward to training the right person and are sure they will enjoy forging a new career in land survey. We hope to introduce our new surveyor in training in the near future so watch this space!

On a different note, but almost as important we are close to making a decision on the purchase of a Laser Scanner, backing up years of laser scanning experience with state of the art hardware.
